## Why a Su-Kam product?

Su-Kam, a leading manufacturer of Power Back-up products, is widely acknowledged as a pioneer in the field of UPS / HUPS in India. In a sector that has traditionally been unorganized, Su-Kam has played a seminal role in upgrading this industry into an organized sector.

We have subsequently acquired very appreciable strengths and product portfolios in UPS and Batteries segments as well. In fact, our major strength is our R&D; innovative, focused and state-of-the-art, recognized by Government of India, Ministry of Science & Technology, Department of Scientific & Industrial Research.

# Powering your modest needs

Shiny 250 & 450 VA\*

## Load Chart & Back-up Time

\*Recommended battery 50Ah to 80Ah for 250VA & 70Ah to 135Ah for 400VA

## What makes Shiny Sine Wave UPS superior?

The Shiny Sine Wave UPS from Su-Kam is here to make you expect more from your power back-up. Being a Sine Wave UPS, it offers non-stop protection for your appliances and more efficiency for reduced electricity bill.

There's more. It is a super silent UPS with automatic protection sensors like overload, short circuit, high temperature etc which is a must to protect your sensitive & expensive appliances.

The cool looks of course, is a bonus.

All this and more. Just to ensure that you live life without a pause.

## Powering your moderate needs

CFL	2	2	2	2	CFL	2	4		2

\*Recommended battery 135Ah to 180Ah for 650VA & 135Ah to 180Ah for 850VA

## Shiny Sine Wave UPS for non-stop comfort

Su-Kam's advanced Fuzzy logic control charging technology senses the requirement of the battery and controls the charging process accordingly. This results in:

### **Huge Savings on Electricity**

Su-Kam's FLC Technology senses the battery voltage and switches it off if there is no change in the battery voltage over time, keeping electricity bills low. Whereas in normal inverters the charger is constantly turned on.

### **Longer Battery Life**

Su-Kam's FLC Technology senses the exact need of the battery every time. If an older battery is unable to accept the level of voltage defined earlier, it automatically sets a new level in accordance with the battery condition and charging need. This leads to enhanced battery life.

### **Reduced Water Topping**

Su-Kam's FLC technology controls the emission of gasses while charging the battery, thus reducing the frequency of water topping significantly.

# Powering your lavish needs

## Shiny 1500 VA\*

### Load Chart & Back-up Time

1500 VA Shiny
